PORTFOLIO: <https://FatemehGhasemiDev.github.io>

Game Programmer

Game Programmer and Software Developer with 4+ years of experience in C# and game development, contributing to 2 commercial mobile titles and projects across different genres. Experienced in designing, developing, and optimizing technical systems, with a strong focus on problem-solving, clean code, and turning complex ideas into reliable, polished software.

WORK EXPERIENCE

Turquoise Games Studio • 10/2024 - Present

Game Programmer

- Develop and maintain gameplay systems for commercial Unity mobile games, including Match Factory and Bingo.
- Took ownership of gameplay features from implementation and debugging to testing and final polish.
- Collaborate closely with designers, artists, animators, QA, and programmers to deliver and refine features.

Indie Game Development • 09/2025 - 09/2026

Sole Gameplay Programmer

- Developed Gnosa as the sole gameplay programmer and handled the technical coordination of the project.
- Worked closely with the game artist to coordinate implementation, gameplay requirements, and development tasks.
- Worked from early prototyping through implementation and gameplay polish.

Self-Employed • 01/2021 - 06/2024

Freelance Game Developer

- Developed 5+ game and software projects using Unity and C#, covering gameplay programming, feature development, debugging, and implementation.
- Worked independently on complete gameplay features from concept and prototyping to functional delivery.

EDUCATION

Bachelor's in Computer Engineering

IAU Azad University • 03/2024 - Present

CERTIFICATIONS

Adobe Photoshop Beginner to Advanced • 01/2024 - 05/2024

Tehran Institute of Technology

English Certificate • 01/2024

Iran Europe Language Institute

EF SET English Certificate • 12/2023

EF SET Organization

Unity Game Engine Development • 11/2022 - 02/2023

Tehran Institute of Technology

PROJECTS

Match Factory - Commercial Mobile Game

Gameplay Programming - Turquoise games

- Developed core gameplay and physics systems involving **hundreds of active objects** interacting, stacking, and moving in real time.
- Built gameplay features including **Unicorn Race**, **Key Hunter**, and six gameplay boosters using physics, AI, coroutines, animation curves, particles, and event-driven systems.
- Optimized physics-heavy gameplay through Rigidbody and collision tuning, while developing reusable tutorial and gameplay systems.

Bingo - Commercial Mobile Game

Gameplay Programming - Turquoise games

- Developed and polished core Bingo systems including **number generation**, **card generation**, **gameplay logic**, and **progression**.
- Implemented UI, reward, animation, tutorial, and **ScriptableObject-based data systems** across gameplay and player-facing features.
- Integrated custom **game analytics events** for tracking gameplay data and player progression.

Hospital Escape

Solo Developer

- Built a first/third-person character controller, camera switching, and modular interaction system for environmental objects and gameplay events.
- Developed task-based progression, puzzle systems, scripted events, and spider enemy AI with detection and chasing behavior.
- Implemented supporting systems including save/load, UI, audio, lighting, and animation workflows.

Bubble Up

Solo Programmer - Global Game Jam 2025

- Implemented physics-based bubble movement, dash mechanics, oxygen survival, environmental hazards, and enemy behaviors.
- Developed custom enemy behaviors including path-following fish and a multi-state jellyfish boss with detection, pursuit, and attack states.

More Project Details

you can see all of my selected work & projects details in my portfolio website: <https://FatemehGhasemiDev.github.io>

SKILLS

Programming: C#, C++, Python

Engine & IDE: Unity Engine, Unreal Engine, Visual Studio, VS Code

Project Management & Version Control: ClickUp, Git, GitHub, GitLab, Notion, SourceTree

3D & Art: Blender, Photoshop

Productivity & Office: Google Workspace, Microsoft Office Suite
